Show Details

The Lower Willamette Group has just sent EPA a letter on a number of issues concerning EPA's recent initial comments on the draft Remedial Investigation risk assessments. The City view is that it would be helpful

to have a reasonable extension of time to discuss further the issues raised in the letter. At a minimum, we hope these discussions could help clarify some apparent disconnects on the technical feasibility or practicality of pursuing the directed analyses. However, the City does not intend to pursue formal dispute resolution on these issues at this juncture. We do believe that some of the issues will merit further discussion as the risk assessments and feasibility study are further developed. We look forward to these additional discussions. Please let me know if you have any questions or concerns with our separate views on these issues.
